

T058 – Air Injector (D255638MS)

Ver1.0 April 2026

From 2020, MS offered its own version of the D255638 Air Injector PCB (now obsolete). The physical size, along with wiring connections and adjustments are same as the original version.

The factory setting is 20sec OFF/1.5sec ON which can be checked with the onboard LED.

| | | |
|----------|--------------------------|-----------------------------|
