

## T043 – Liner Lifetimes - July 2018 (v1.0)

To get the best performance and animal comfort from your MS liners, they should be changed regularly every 2500 milkings or six months, whichever comes sooner. All liners in a parlour should be changed at the same time. Frequent liner replacement will reduce risk of contamination and spread of mastitis.

*Example below; 150 cows &  
 16 milking points (twice daily milking)= 19 week liner change*

		Recommended MS Liner Change No of Weeks - Twice A Day Milking																		
		Number of Milking Points																		
Cows		4	6	8	10	12	14	16	18	20	22	24	26	28	30	32	34	36	38	40
10		26																		
20		26																		
30		24	26																	
40		18	26																	
50		14	21	26																
60		12	18	24																
70		10	15	20	26															
80			13	18	22	26														
90			12	16	20	24	26													
100			11	14	18	21	25	26												
125			11	14	17	20	23	26	26											
150			10	12	14	17	19	21	24	26	26									
175				10	12	14	16	18	20	22	24	26	26							
200					11	12	14	16	18	20	21	23	25	26	26					
225					10	11	13	14	16	17	19	21	22	24	25	26				
250					10	12	13	14	16	17	19	20	21	23	24	26	26	26		
275						11	12	13	14	16	17	18	19	21	22	23	25	26		
300							11	12	13	14	15	17	18	19	20	21	23	24		

		Recommended MS Liner Change No of Weeks - Three Times A Day Milking																		
		Number of Milking Points																		
Cows		4	6	8	10	12	14	16	18	20	22	24	26	28	30	32	34	36	38	40
