

T031 – Goat & Sheep Liner Wash Options

Ver3.0 Mar 2021

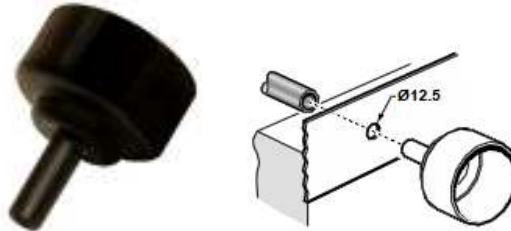

Goat Cluster from MS (e.g. 612909 /Corr.F96CAPRICTMS)

Wash Options – Goat (For use with the D381997 range of liners)

1. Wash Jetter Tray (608308/Corr.D498794MS)
With side support clips, one unit for two goat clusters (only available in orange). This offers the best shell support while clusters are washing/stored but may not readily disengage on ACR start-up, necessitating manual release on vacuum start-up.

2. Wash Cup Kerb Mount (612523/Corr.D390726MS)
Opening of 55mm diameter and mounted through 1/2" hole in the kerb. Wash tubing can be reinforced at the rear with hose clips. Optionally, the stem can be threaded for an M12 nut for more robust fixing to the kerb plate.

3. The same wash cups can be used with tee piece and tubing; 612754/Corr.M0030MS (Clear) or 612755/Corr.M0031MS (Orange)

4. Wash Cup Pipe Mount (613899/Corr.D498814MS)
These are directly clamped to the cylindrical wash water pipework

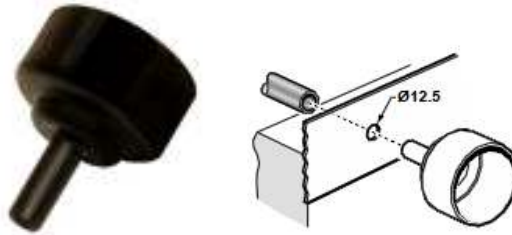

- Internal Jetter Head 22mm for Goat (Black) (615012/Corr.M0460MS)
These may be used mounted to the kerb or with tubing like the wash cups.

Wash Options – Sheep (For use with the D381921x2MS liner)

- Wash Cup Kerb Mount (302753/Corr.D390727)
Opening of 48mm diameter and mounted through 1/2" hole in the kerb. Wash tubing can be reinforced at the rear with hose clips. Optionally, the stem can be threaded for an M12 nut for more robust fixing to the kerb plate. Can also be connected with tee pieces and tubing.

- Wash Cup Pipe Mount (303681/Corr.D498813)
These are directly clamped to the cylindrical wash water pipework

- Internal Jetter Head 18mm for Sheep (Blue) (614829/Corr.M0396MS)
These may be used mounted to the kerb or with tubing like the wash cups.
